

LenderVue

NMLS Integration System

The Challenge of Integrating NMLS Data with State Licensing Data

The Nationwide Multistate Licensing System (NMLS) provides State licensing authorities with a system of record for applicant information on a national basis. Many licensing agencies want to utilize NMLS data to support their processes such as application management and review, third party regulatory compliance, and management reporting. The challenge is that while a State typically has access to this data, all of the data integration and analysis is manual and requires significant staff time. LenderVue is able to automate the collection and integration of this data with your existing systems and processes. LenderVue makes this information consumable, operable, and usable in an automated fashion.

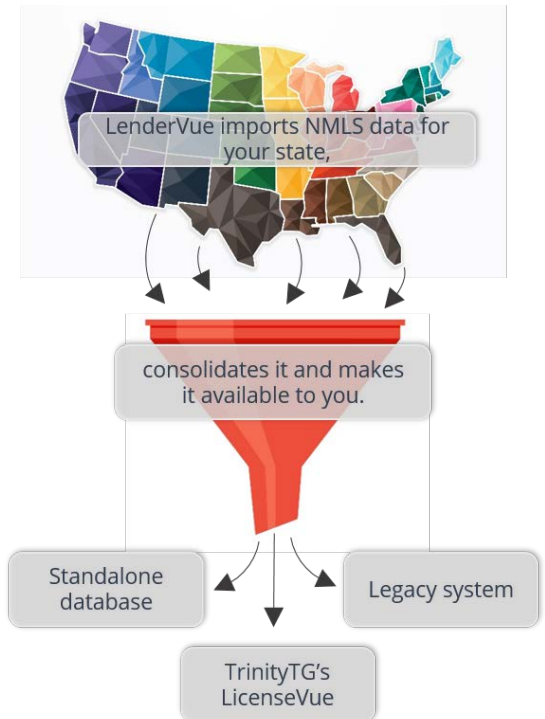

The Solution for NMLS System Integration

Trinity Technology Group's (TrinityTG) LenderVue software helps Governments enhance their existing licensing systems and processes by automating the gathering and integration of the necessary NMLS data. LenderVue is a modern application that delivers full NMLS interoperability, provides integration, shows compliance and anomalies with State data, and provides full data archival in desired formats. LenderVue provides government staff with automated daily downloads supporting important lender information in a consumable format that can be integrated with existing systems or implemented as a stand-alone solution.

Key Features and Benefits

LenderVue works either in a cloud-based or on-premise environment to integrate with NMLS to provide the necessary information in a format that can be loaded within existing legacy applications. LenderVue provides a reliable and industry leading backbone which is configurable, extendable, and maintainable. LenderVue can grow with your business needs by providing additional data to accommodate new business functions and regulations. Implementing LenderVue also alleviates many typical business challenges, including:

- Validating regulated lender information and activity against other Government requests/requirements for information such as delinquent parent requests and tax compliance requests
- Supporting and populating existing licensing, examination, and enforcement systems with updated NMLS information
- Reconciling data inconsistencies between public-facing information in NMLS and State systems

LenderVue automates the access to NMLS information and provides flexible integration with existing systems and reporting services.

LenderVue helps manage and integrate key NMLS information, including:

License Applications

License Amendments

Regulated Individuals and Sponsorships

Compliance Checks

Surrender Requests

Some of the key benefits that LenderVue delivers:

Enhanced Reporting Capabilities use NMLS data to create/manage reports or supplement existing

One Version of the Truth Helps consolidate and integrate NMLS data with internal data of regulated entities.

Data can be expanded and supplemented as needed.

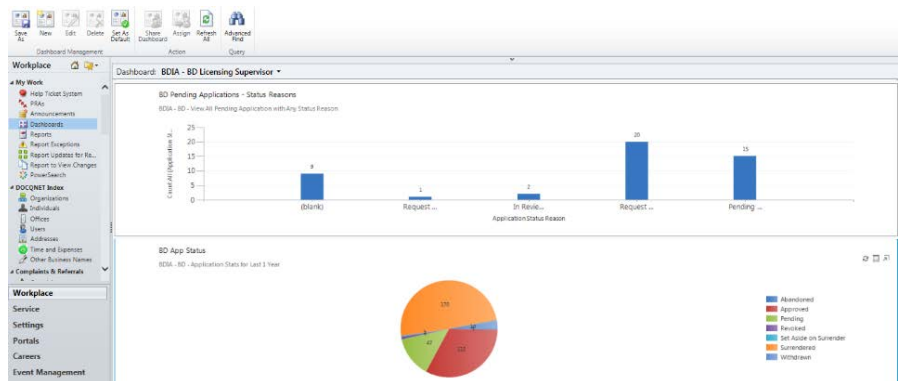

Can be integrated with LicenseVue or existing internal systems for a full picture of your regulated industry.

Sustainable & flexible technology stack maximizes investment.

Additional User Benefits

- **Control Your Data.** Import data to enhance your existing systems and reporting, or pair LenderVue with TrinityTG's LicenseVue application for a complete end-to-end licensing solution.
- **Variance Reports Provide Daily Change Information.** Reports highlight relevant changes made in NMLS on a daily basis. The reports can be utilized to assist with licensing processes, generate potential compliance cases, report on your lending community's activity, and queue changes that require validation before being used to update government licensing records.
- **Automated Data Import.** New reports are generated daily and downloaded automatically. There is no need to log in or generate reports manually.
- **Report Archive.** LenderVue automatically groups and archives all NMLS reports received daily and creates a historical repository of all relevant NMLS data.
- **Consolidated Index of Businesses and Individuals Associated with NMLS Lending.** LenderVue provides access to a consolidated list of relevant business and individual information with important supplemental information to help uniquely identify regulated entities.
